To Whom It May Concern,

This letter serves to confirm that AgriVitality is responsible for overseeing the applied research programme and associated protocols for the evaluation and development of **Halogen Green's Magtasium** product. This work is conducted by AgriVitality's research team in association with researchers from the FPLRI Research, Innovation and Technology Institute and Life AgriScience.

As part of this mandate, AgriVitality conducts comprehensive greenhouse and in-field and on-farm trials to assess the product's application, usage, and performance under relevant agricultural conditions. In addition, AgriVitality ensures that all research activities are aligned with Environmental, Social and Governance (ESG) compliance principles, contributing to responsible innovation and sustainable agricultural practice.

Furthermore, AgriVitality manages and guides all necessary processes relating to the registration of **Magtasium** and related products under South African legislation, including compliance with the Fertiliser, Farm Feeds, Agricultural Remedies and Stock Remedies Act (Act 36 of 1947) and other applicable regulatory frameworks.

We hereby confirm our ongoing commitment to supporting the scientific verification, regulatory compliance, and sustainable integration of **Magtasium** into agricultural systems.

Yours sincerely,

A handwritten signature in black ink, appearing to read 'Wayne F. Truter', is written over a horizontal line.

Prof. Wayne F. Truter
